Syllabus: The Hebrew Bible

Shaye J.D. Cohen

Fall 2013, M., W., (F.), at 10, and a weekly section to be arranged.

This course is a survey of the major books, genres, institutions, and ideas of the Hebrew Bible (commonly called the Old Testament). The course will also treat the historical contexts in which the Bible emerged, and the Bible's role as canonical scripture in Judaism and Christianity.

NB: In this syllabus the word “Bible” refers to the collection of books that Christians call “the Old Testament,” that Jews call Tanakh, and that ecumenically-minded and progressive people call “the Hebrew Scriptures” or “the Hebrew Bible.” It does NOT refer to the collection of books that Christians call “the New Testament.”

Course reading: Note that much of the reading consists of biblical texts, which must be read s-l-o-w-l-y.

Required reading:
2) James Kugel, How to Read the Bible: A Guide to Scripture Then and Now. NB: You will need your copy of the Bible next to you when you read Kugel. To illustrate the passage under discussion, he frequently cites numerous other biblical passages and you will want to check at least some of them in order to understand the argument.
